Atty Docket No. 1169.011

**Specification Amendment under 37 CFR 1.121 (b)**

*SW 2/16/07* Please add the following paragraph under line 8, page 10 of the original specification.

Referring to Fig. 4, the patch includes a substantially thin patch body 72. The patch body 72 includes a base side 74 that is attached to the base member 20, and a main side 76 that is attached to the main member 12. The sleeve 46 is provided between the base side 74 and the main side 76 of the patch body 72.

**Specification Amendment under 37 CFR 1.121 (b)**

12

*SW  
2/16/07*  
Please add the following paragraph under line 21, page 11 of the original specification.

Referring Figs. 1, 3 and 7, further details regarding how the fabric member 28 is attached to the base member 20 is explained.

The non-front section 32 of the fabric member 28 includes a upper fabric portion 80, a lower fabric portion 82, and two side fabric portions 84 that connect the upper fabric portion 80 and the lower fabric portion 82 whereby the fabric member 28 has a baggy shape.

The upper fabric portion 80 includes a front end 86 and a rear end 88. The lower fabric portion 82 includes a front end 90 and a rear end 92. The front end 86 of the upper fabric portion 80 and the front end 90 of the lower fabric portion 82 are connected to the main member 12. The rear end 88 of the upper fabric portion 80 and the rear end 92 of the lower fabric portion 82 are adjacent or coincide with each other.

The rear end 88 of the upper fabric portion 80 and the rear end 92 of the lower fabric portion 82 are selectively attached near to the rear end 94 of the base member non-front section 26 with the connecting member 34, or detached from the base member non-front section 26 whereby the fabric member 28 is selectively pulled diagonally between the main member 12 and the base member 20, or becomes draped toward the first closed loop 14.
